Tarnished: - I was expecting more from this game, perhaps in the form of a more complex class system - Saves can be emptied while in the middle of battle - The animation of the opponent when deflected is abrupt - Some of the special moves require input in the form of pressing a button, or holding down on the d-pad - Each character's health has different values and can be depleted - Players are thrown into random dungeons to search for treasure, which can be used to enhance weapons and armor - Players fight on their own or in PVP against other users - The dungeons are made up of a maze of paths and are large, making them difficult to navigate - Players can be added to or removed from an ally/foe list - As a minor problem, the camera can take a while to get used to, and it sometimes skips the frame at high speed - Beautiful backgrounds that respond to the movement of your character - Players may only move a certain distance per turn before losing stamina - Players may draw items from the floor when in the presence of the large boss enemies - Players can have two weapons with different enhancements
