Max DVD Author (formerly Max Movie Maker) Crack+ Free Download [Mac/Win]

This program enables you to create your own DVD or SVCD directly from your home movies, without the need for third-party editing tools. Max DVD Author can work as a stand-alone application or as a component within a larger video editing or DVD creation application. The program includes all the features found in the DVD authoring area, including converting video files to DVD, adding and customizing the menu and chapters, applying audio effects, as well as creating a DVD with a background picture. In contrast to other DVD authoring tools, this application is designed to be used simply and efficiently, without the need for advanced video editing skills or knowledge in DVD authoring. The program supports AVI, MPG, WMV, DIVX, MPEG, QuickTime, MPEG-4/H.264, MP4, RM/RMVB and ASF input formats. Max DVD Author supports all the major video formats, including HD video. You can also add subtitles and insert special effects. Although the software is aimed at users having intermediate knowledge in video editing, you can choose to ignore the features that require more advanced video editing skills. The menu can be created in 2 ways: A template menu contains the general chapter list, thumbnail list and audio description. The user can also modify this menu using a drag and drop interface. A user-defined menu is a list of video files, one to be shown on each of the chapters. The program can create both NTSC and PAL DVD. For each disc, the video can be stretched to fill the entire DVD video region, resulting in a 16:9 aspect ratio (default), or in a 4:3 aspect ratio, depending on user preference. The program is able to create different types of chapters. Specialized chapters (video, audio and sub-titles) are automatically created in the video files while any other chapter type (standard or music) is user-defined. Max DVD Author is able to convert an unlimited number of video files to DVD by preserving the original audio and video level information. You can also adjust the bit rate and create the DVD in a "salt and pepper" mode (alternating menus of black and white video), instead of the usual "white background on black text" look. Furthermore, the output can be a compatible SVCD, VCD or DVD-R or DVD-RW. Max DVD Author can also be used to burn movies to DVD or other discs. It supports the use of any type of disc
